**Claire Janine Koppel**

geboren te Leiden  
in 1990

**Promotores:**

Prof. dr. M.J. Schalijs

Prof. dr. M.R.M. Jongbloed

**Co-promotor:**

Dr. H.W. Vliegen

**Promotiecommissie:**

Prof. dr. M.J. Goumans

Prof. dr. R.J. de Winter (Amsterdam Universitair Medisch Centrum)

Prof. dr. T. Ebels (Universitair Medisch Centrum Groningen)

Dr. I.A. Dekkers

## Table of contents

|                                                                                                                                                                            |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Chapter 1. General Introduction .....                                                                                                                                      | 7   |
| <br><i>Part 1. Coronary anomalies without concomitant congenital heart disease</i>                                                                                         |     |
| Chapter 2. The first Multicentre Study on Coronary Anomalies in the Netherlands: MuSCAT .....                                                                              | 25  |
| Chapter 3. A comprehensive analysis of the intramural segment in interarterial anomalous coronary arteries using CT-angiography.....                                       | 39  |
| Chapter 4. The significance of symptoms before and after surgery for anomalous aortic origin of coronary arteries in adolescents and adults .....                          | 59  |
| <br><i>Part 2. Coronary anomalies in congenital heart disease</i>                                                                                                          |     |
| Chapter 5. Coronary anomalies in tetralogy of Fallot – a meta-analysis .....                                                                                               | 79  |
| Chapter 6. The Leiden Convention coronary coding system: translation from the surgical to the universal view.....                                                          | 99  |
| Chapter 7. Applicability of the Leiden Convention and the Lipton classification in patients with a single coronary artery in the setting of congenital heart disease ..... | 121 |
| <br><i>Part 3. The sequelae of coronary ischemia</i>                                                                                                                       |     |
| Chapter 8. Epicardial expression of nerve growth factor – potential role in hyperinnervation after cardiac damage .....                                                    | 143 |
| Chapter 9. The role of the axonal guidance cue Sema3A in innervation of the postnatal heart in health and disease .....                                                    | 163 |
| Chapter 10. English summary and future implications.....                                                                                                                   | 189 |
| Chapter 11. Nederlandse samenvatting, implicaties en toekomstperspectieven.....                                                                                            | 197 |
| List of publications .....                                                                                                                                                 | 206 |
| Dankwoord.....                                                                                                                                                             | 208 |
| Curriculum Vitae.....                                                                                                                                                      | 209 |
